Professional Summary

Senior VR/XR Developer with 10+ years of experience designing and delivering high-performance immersive VR, AR, and XR applications using Unity and Unreal Engine. Specialized in Architectural Visualization, Product Configurators, and Industrial Training Simulators. Proven expertise in optimizing XR applications for Meta Quest, Pico, and HTC Vive while delivering high-quality immersive solutions for Japanese clients.

Professional Experience

Quanta Designs India Pvt. Ltd. *(formerly Pamz3D Designs India Pvt. Ltd.)*

Senior VR/XR Developer | Jan 2022 – Present

- Led the design and development of 12+ immersive VR, AR, and XR applications using Unity and Unreal Engine for Japanese clients.
- Optimized rendering performance and memory usage, consistently achieving **72–90 FPS** on standalone VR devices.
- Collaborated directly with Japanese clients to gather requirements, present progress, and deliver production-ready VR/XR applications.

VR/AR Developer | Jun 2018 – Dec 2021

- Developed architectural visualization, product configurator, and industrial training applications for Japanese clients.
- Built interactive 360° WebVR experiences using Shapspark, Krpano, and Everpano, enhancing user engagement.
- Improved application performance, rendering quality, and cross-platform user experience.

Unity Developer | Jun 2015 – May 2018

- Developed interactive 3D, VR, and AR applications using Unity and C# from concept to deployment.
- Implemented key features, resolved defects, and maintained production applications.
- Collaborated with cross-functional teams throughout the full development lifecycle.

Technical Skills

- **Game Engines:** Unity, Unreal Engine
- **Programming Languages :** C#, JavaScript,C++, HTML
- **XR Technologies:** OpenXR, XR Interaction Toolkit, AR Foundation, Meta XR SDK , PICO SDK
- **Target Platforms:** Meta Quest, HTC Vive, Pico, Windows, Android, WebGL
- **WebVR & 360° Visualization:** Krpano, Everpano
- **Web-Based 3D Visualization:** Shapspark
- **Development Tools:** Visual Studio, Visual Studio Code

Key Projects

- **Industrial Training Simulator** – Unity • C# • Meta SDK
Developed interactive VR application for equipment safety and operational training.
- **Forklift Training Simulator** – Unity • C# • Pico SDK
Created standalone VR simulator for realistic forklift operation and safety training.
- **Car Configurator** – Unreal Engine • Blueprints
Built a real-time vehicle configurator with interior seat material customization, exterior paint customization, and vehicle light controls.
- **VR Residential Walkthrough** – Unreal Engine • Blueprints • SteamVR
Developed immersive residential walk-through with interactive navigation and realistic environments.
- **Office Space Virtual Tour** – Everpano • WebVR
Created a browser-based 360° office tour with hotspot navigation.
- **Sofa AR** – Unity • Vuforia • iOS
Developed a marker-based AR application that enables real-time furniture visualization in physical environments.

Achievements

- Successfully delivered over 20 VR, AR, and XR applications across architectural visualization, industrial training, product visualization, and virtual tour solutions.
- Mentored and guided 3 junior developers in Unity and XR application development, supporting their technical growth and project contributions.
- Contributed to 10+ years of continuous growth within the organization, progressing from Unity Developer to Senior VR/XR Developer.

Education

Master of Computer Applications (MCA)

Anna University, Chennai | **2014**

Bachelor of Science (B.Sc.) in Computer Science

Bharathiyar University, Coimbatore | **2011**
